2. Sign-in with your Platform credentials.
If you do not have a Platform account, click **Don't have an account? Get started for free.** or click **Get started for FREE!**, and follow the onboarding instructions.

Once you are signed into the Platform, the AMPLIFY Platform home page will be displayed.

AMPLIFY Platform

The AMPLIFY Platform homepage includes the **Services** tab and the **Labs** tab.

Services

The **Services** tab includes the API Builder, App Builder, Mobile Backend Services, Dashboard, Learn, Support, Extend, and Coming Soon sections.

Welcome, Charles James | You are logged into The Axway Group, Inc. as an Administrator

Services

Labs

**Dashboard**

Full lifecycle visibility and real-time insights for all of your apps and APIs.

[Go to Dashboard](#)[Docs](#)**API Builder**

Build APIs and microservices with the API Builder framework.

[Get started](#)[About](#)[Docs](#)**App Builder**

Get started building cross-platform native apps with Titanium SDK, Studio, and CLI.

[Get started](#)[About](#)[Docs](#)**Mobile Backend Services**

Pre-built services like push notifications, NoSQL database, geolocation, and more.

[Manage](#)[Docs](#)**Learn**[Quick Start](#)[Developer Portal](#)[Developer Blog](#)**Support**[Documentation](#)[Enterprise Support](#)**Extend**[Marketplace](#)[DevLink](#)[Coming Soon](#)[Try Syncplicity](#)

Dashboard

The **Dashboard** section provides access to Dashboard. Dashboard provides full lifecycle visibility and real-time insights for all of your applications and APIs. To access the Dashboard documentation, click **Docs**. To access the Dashboard, click **Go to Dashboard**. To learn more about the Dashboard home page, refer to [Dashboard](#).

API Builder

The **API Builder** section provides information on how to build APIs and microservices with the API Builder framework. To learn more about API Builder, click **About**. To access the API Builder documentation, click **Docs**. To get started building APIs and microservices with the API Builder framework, click **Get Started**.

App Builder

The **App Builder** section provides information on how to build cross-platform native apps with Titanium SDK, Studio, and CLI. To learn more about App Builder, click **About**. To access the Titanium SDK documentation, click **Docs**. To get started Get building cross-platform native apps with Titanium SDK, Studio, and CLI, click **Get Started**.

Mobile Backend Services

The **Mobile Backend Services** section provides access to pre-built services like push notifications, NoSQL database, geolocation, and more. To access the Mobile Backend Services documentation, click **Docs**. To manage Mobile Backend Services datasources, click **Manage**. For information on managing Mobile Backend Services datasources, refer to [Managing Mobile Backend Services Datasources](#).

Learn

The **Learn** section provides links to the Quick Start page, to the Developer Portal, and to the Developer Blog. For more information on the Quick Start page, refer to [AMPLIFY Quick Start](#). To explore the Developer Portal, click **Developer Portal**. The Developer Portal includes portals to develop mobile applications, to build and manage APIs, to explore AMPLIFY APIs, to modernize content collaboration, and to build and extend your Managed File Transfers. The Developer Blog provides information on the latest product updates and provides insights geared to developers and businesses.

Support

The **Support** section provides links to Axway's documentation and enterprise support portals. To explore the Axway documentation portal, click **Documentation**. To access the Axway Enterprise Support portal, click **Enterprise Support**.

Expand

The **Expand** section provides links to the Axway AMPLIFY Marketplace and to the Axway AMPLIFY Developer's Link. To explore and select from offerings on the Axway AMPLIFY Marketplace, click **Marketplace**. To test your applications and APIs, click **DevLink**.

Coming Soon

The **Coming Soon** section provides a link to try Syncplicity. To sign up and try Syncplicity, click **Try Syncplicity**. To try Syncplicity for thirty days, complete the Enterprise Edition sign-up form, agree to the terms of service, verify that you are not a robot, and click **Free 30 Day Trial**. To explore other Syncplicity plans, click **Looking for Other Plans?**.

Labs

The **Labs** tab provides early public access to alpha and beta features and products, so users can guide product direction and we can make enhancements, prior to formal release as a GA product or initiative. Labs projects are released as-is with no support and usage is at your own risk. To access the **Labs** tab, accept the conditions on the *Welcome to Away Labs* screen.

Welcome to Axway Labs!

Labs products let you get hands-on with emerging Axway capabilities before they are generally available. You will also have a greater opportunity to provide feedback and influence product direction.

Because these are pre-release products, there are some limitations to keep in mind. Your acceptance and use is subject to the following:

- There are no warranties
- Use only in non-production environments and test data
- Use may not generate revenue
- Axway has no support or maintenance obligations
- Axway may terminate access or rights at any time without advance notice

[Decline](#) [Accept](#)

Currently, the **Labs** tab provides early access to API Central is available. To learn more about API Central, click **About**. To explore the API Central documentation, click **Docs**. To request early access to API Central, click **Request Access**. Once you have requested access, the **Request Access** link will update to **Provisioning**. While your access is being provisioned, you will receive provisioning status updates. When your access request has been approved and provisioned, the link will update to **Go**. Once your access has been approved, click **Go**. Clicking **Go** will transfer you to the *API Central Services Home* page where you can select to **Register an API**, **Create a client app**, or **Watch your traffic**. Refer to [API Central](#) for additional information.

Welcome, Charles Jayaram | You are logged into The Open Group, Inc. as an Administrator

Services Labs

Provisioning is taking longer than expected. Try accessing the service again later.

Welcome to Axway Labs!

Are you a power user who likes to play with cutting edge technology? Axway Labs provides early access to emerging innovation prior to it being ready for production use. It is a direct feedback channel allowing you to influence the next generation of Axway products.

Please look around, try to get something working, try to break something - just be sure to tell us all about it using the chat bubble.

API Central
Manage, grow, and secure your API catalog with API Central lifecycle management tools.

Provisioning... About Docs

AMPLIFY Quick Start

The AMPLIFY Quick Start page enables to select where you would like to start your exploration of the AMPLIFY Platform. You can select **Build, manage, and monitor Mobile Apps** to get started building cross-platform native apps using CLI or IDE or you can select **Create, secure, and publish APIs and Microservices** to get started creating APIs and microservices with API Builder. You can also skip the Quick Start page and go directly to the AMPLIFY Platform homepage by selecting **Skip this and go to AMPLIFY Home**.

It's a big beautiful platform.

Where would you like to start?

Build, manage, and monitor
Mobile Apps

Create, secure, manage, and publish
APIs and Microservices

Relax. You can come back here at any time.

[Skip this and go to AMPLIFY Home](#)

If you select **Build, manage, and monitor Mobile Apps**, you will be forwarded to the *Get started with App Builder* page where you can select to start building cross-platform native apps using either *Axway Appcelerator Studio* or *Appcelerator CLI*. If you select **Create, secure, and publish APIs and Microservices**, you will be forwarded to the *Get started with APIs and Microservices* page where you can select either **Create APIs and Microservices** using *API Builder* or **Import and manage existing APIs** using *API Central* once your access to API Central is provisioned.

Access Dashboard

To access Dashboard, select **Go to Dashboard** in the Dashboard section of the AMPLIFY Platform home page. The Dashboard home page will open. For more information, see [Dashboard](#).

Dashboard

The Dashboard home page includes the **Project** tab and the **Overview** tab. The **Project** tab displays list of applications for the selected organization. The list of applications can be filtered by application type (Titanium SDK, APS SDK, Node.js, API Builder, Mobile Backend Services, and so forth). Additionally, select the **Show only my apps** check box to limit the displayed list of applications to display only your applications. You can also search the list of applications by name or ID and select favorite applications from the list of applications. The **Overview** tab displays key metric information. For additional information on the key metrics, refer to [Viewing Metrics](#).

The screenshot shows the AMPLIFY Platform Dashboard Overview tab. At the top, there are navigation tabs for 'Projects' and 'Overview', with 'Overview' selected. Below the tabs, there are filters: 'All (36)', 'Mobile Apps (16)', 'API Runtime Apps (2)', and 'Mobile Backend Services (18)', along with a 'Show only my apps' checkbox. A search bar is present with the placeholder text 'Search by app name, ID, or creator'. The main content is a table of applications with columns for 'Favorite', 'Name', 'Type', and 'Created'. The table contains 10 rows of application data. At the bottom of the table, there are pagination controls (1, 2, 3, 4) and a '10 per page' dropdown menu. The footer of the dashboard includes 'Home / Apps', 'Docs', 'Support', 'Status', and '© 2018'.

Favorite	Name	Type	Created

To manage an application, select the application to manage from the list of applications.

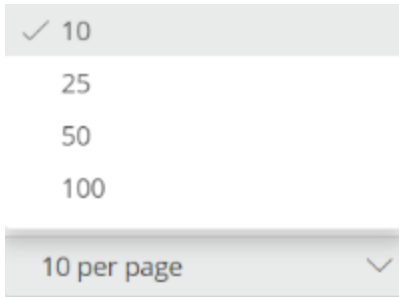

If you haven't created any applications yet, you will be directed to the *You don't have any apps yet!* page. Don't worry. It's easy to get started creating apps using the AMPLIFY Platform. It should take you only a few minutes to create an app. Once you do, your Dashboard will have data here. To get started creating applications, click **Get the latest tools**. You will be forwarded to the *Get started with App Builder* page where you can select to get started building apps with either [Axway Appcelerator Studio](#) or [Appcelerator CLI](#).

Application List Sorting

The Name, Type, and Created columns in applications list can be sorted either in ascending and descending order. Note that applications selected as favorites will always appear at the top of application list in the sorted order.

Application List Paging

The number of displayed applications per page can be selected using the *per page* drop-down menu.

The number of applications displayed per page can be set to:

- 10 per page
- 25 per page (default)
- 50 per page
- 100 per page

Dashboard Navigation

Top Navigation Bar

The top navigation bar in Dashboard lets you select an application or API to view or manage, register a new Android or iOS application, and change your current organization. Application team members can access information about their own applications. Organization admins can access information about all of the organization's applications. See [Managing Organizations](#) for more information.

Use the following items to navigate through the Dashboard:

- **Navigation menu** – Navigate to the AMPLIFY Platform products or the Marketplace, navigate to the Labs, and navigate to Support and Learning.
- **Home** – Click to return to the Dashboard home screen.
- **Apps menu** – Select an [application to manage](#), or [register a new Android or iOS application](#).
- **Add menu** – Register a new Android or iOS app, create a new Mobile Backend Services data source or add a new organization member
- **Orgs menu** (may not be visible) – Select a different organization to which you belong. Dashboard administrators can also select **Manage Orgs** to [manage organizations](#), its members, and applications. If you only belong to one organization, this menu will not appear in the top navigation bar.
- **Profile menu** – View your member profile and access the Download Center to download premium modules.
- **Notifications menu** – Displays notifications and latest organization activity.

Bottom Navigation Bar

The bottom navigation bar contains menus for enabling Demo Data mode, viewing documentation and release notes, and sending feedback.

- Click **Demo Data** to populate Dashboard with demonstration data to see how Dashboard looks if you had several applications and APIs in production.
- Click the **Dashboard** version number, for example, **5.0.0**, to view release notes.
- Click **Docs** view the latest [Appcelerator Dashboard](#) documentation.
- Click **Support** to open the [Axway Developer Portal](#) portal (login required).
- Click **Status** to open the [Axway AMPLIFY Platform Status](#) page.
- Click the **copyright** to view some boring legal documents and software copyrights.
- Click the **Chat** icon to open to report a problem or make a suggestion.
