

# CSS Development

Use the Studio CSS Editor to code the styles for your web sites.

## Introduction

The image below shows a CSS file open in the CSS Editor.

A screenshot of a web development IDE's CSS editor. The window title bar shows four tabs: 'style.css' (active), 'index.htm', 'style.css', and 'layerlib.js'. The editor area contains CSS code with line numbers on the left. The code defines styles for 'td', '.lastrow', and 'h2' elements. The 'td' rule sets font-family to 'Arial, Helvetica, sans-serif' and font-size to '12px'. The '.lastrow' rule sets border-bottom-style to 'solid', border-bottom-color to '#000066', and border-bottom-width to 'thin'. The 'h2' rule sets font-family to 'Arial, Helvetica, sans-serif' and font-size to '14px'.

```
23 )
24
25 td {
26     font-family: Arial, Helvetica, sans-serif;
27     font-size: 12px;
28
29 }
30
31 .lastrow {
32     border-bottom-style: solid;
33     border-bottom-color: #000066;
34     border-bottom-width: thin;
35
36 }
37
38 h2 {
39     font-family: Arial, Helvetica, sans-serif;
40     font-size: 14px;
```

## Contributing new CSS properties

## Adding default validation filters
