### About this release

Titanium SDK 6.0.4.RC is a patch release of the SDK, addressing high-priority issues from previous releases.

As of this GA release, the previous Titanium SDK patch release is no longer supported. Note: major and minor releases continue to be supported according to their nominal lifetime. See [Axway Appcelerator Deprecation Policy](#) and [Nominal Lifetimes](#) documents for details.

### Fixed issues

- [TIMOB-23313](#) - iOS app rejected because "Invalid Swift Support - The SwiftSupport folder is missing"
- [TIMOB-23542](#) - Memory-leaks and warnings across the iOS-project
- [TIMOB-24165](#) - Android: Unable remove action bar using custom theme when the window background color is transparent.
- [TIMOB-24265](#) - Android: Application can't recover from storage permission change
- [TIMOB-24316](#) - Android: Can't get the right URL if app resume by URL for the second time
- [TIMOB-24364](#) - iOS: HTTP Client leaks memory during upload using kroll-thread, eventually causing a force close
