

Appcelerator CLI 5.4.0.Beta Release Note

Appcelerator CLI 5.4.0.Beta - 13 July 2016

Appcelerator CLI 5.4.0.Beta is a minor release that includes new features, improvements, and bug fixes.

As of this release, CLI 5.3.x will not be supported six months from 5.4.0.GA's release date. See [Axway Appcelerator Deprecation Policy](#) and [Nominal Lifetimes](#) documents for details.

Component Versions

The following components are shipped with CLI 5.4.0.Beta:

Alloy	1.9.1
Arrow Builder	1.8.2
Arrow Cloud CLI	1.2.1
Titanium CLI	5.0.9

New Features

- [CLI-875](#) - `appc use` command should allow `--prerelease` option
 - The `appc use` command allows you to use pre-release versions by using the `--prerelease` flag

Improvements

- [CLI-741](#) - Allow for refreshing of session without logging in again explicitly
 - APPC CLI allows for refreshing of a session without having to log in again

Fixed Issues

- [CLI-941](#) - Running `appc access get` on an unpublished app won't throw correct error
- [CLI-955](#) - CLI should not tell a user to install a pre-release CLI as an update from a GA version
- [CLI-988](#) - "-o" (org-id) is not honored with `appc login`
- [CLI-998](#) - We are displaying an OEM vendor name in logging and should not
- [CLI-999](#) - "(node:19181) fs: re-evaluating native module sources is not supported." message appears
