

Mobile Backend Services SDKs

In addition to the REST APIs, Mobile Backend Services provides several SDKs you can use to integrate Mobile Backend Services into your native applications.

- [Titanium](#) applications can easily integrate with Mobile Backend Services using the `ti.cloud` module, which ships with the Titanium SDK.
- [Android](#) applications can use the Mobile Backend Services Android SDK to integrate with Mobile Backend Services.
- [iOS](#) applications can use the Mobile Backend Services iOS SDK to integrate with Mobile Backend Services.
- [Node.js](#) applications can use the Mobile Backend Services Node SDK to integrate with Mobile Backend Services.
