

PyDev Download

This document has information about requirements for PyDev.

- Important
- Requirements
- Important
- URLs for Aptana Studio 3 (with PyDev preinstalled):
- URLs for PyDev as Eclipse plugin
- Get zip releases

Important

First-time users are **strongly** advised to read the [PyDev Getting Started](#), which explains how to configure PyDev properly.

Requirements

- Java 5 or higher (Java 6 recommended)

At least one of:

- Python (2.1 or newer)
- Jython (2.1 or newer)
- IronPython (2.6 or newer)

and

- Aptana Studio 3
- Aptana Studio 2
- Eclipse (3.2 to 3.7)

Note if using Eclipse standalone: Python and IronPython require only the Platform Runtime Binary (download around 45-50 MB), and Jython also requires JDT.

Important

- PyDev is preinstalled in Aptana Studio 3.
- For using the Django Templates editor, Aptana Studio 3 is required.
- If PyDev is used with Aptana Studio 3, it **cannot** be installed or updated separately (Aptana Studio 3 must always be updated as a whole)

URLs for Aptana Studio 3 (with PyDev preinstalled):

Main:	<ul style="list-style-type: none">• Standalone: http://aptana.com/products/studio3/download• Eclipse plugin (update manager URL): http://download.apana.com/studio3/plugin/install
Nightly builds:	<ul style="list-style-type: none">• Please follow the instructions to get the Aptana Studio 3 nightly from Changing the Update Type

URLs for PyDev as Eclipse plugin

URLs to use when updating with the Eclipse update manager:

Main:	<ul style="list-style-type: none">• http://pydev.org/updates
Nightly builds:	<ul style="list-style-type: none">• http://pydev.org/nightly
