

Axway Appcelerator Studio Release Notes

Studio 6.0.0.GA - 2 June 2020

Studio 6.0.0.GA is a major release that includes new features, improvements, and bug fixes.

32-bit Builds Removed

32-bit builds of Studio are no longer supported, as Eclipse has removed 32-bit OS support.

API Builder Support Removed

TISTUD-9207 - Inline with the API Builder v3 deprecation, API Builder support has been removed from Studio

New features

- TISTUD-9056 - Java 10 support for studio
- TISTUD-9132 - Java 11 support for studio

Improvements

- TISTUD-8879 - Install latest Node.js LTS version
- TISTUD-8991 - Studio: Eclipse Upgrade from Oxygen to Eclipse 4.9(2018-09)
- TISTUD-9115 - Studio 6.0 GA: Update Node.js version distributed by Studio
- TISTUD-9119 - Liveview: Disable hook attachment when using SDK 8 or above
- TISTUD-9138 - Support 'source-maps' property in tiapp.xml
- TISTUD-9148 - Update the Node.js installer links to the latest LTS 10.13
- TISTUD-9155 - Studio 6.0 GA: Install Java 11 with Studio 6.0 installers
- TISTUD-9156 - Studio 6.0 RC: Update Studio 6.0 with the JDK 11 temporary links for macOS and Win64
- TISTUD-9162 - TSS: Update TSS parser to handle \$.args usage in TSS files
- TISTUD-9197 - Upgrade Eclipse base to 4.13
- TISTUD-9204 - Android: Module packaging disabled in studio for module created with SDK supporting gradle

Fixed issues

- TISTUD-7442 - Appcelerator Studio doesn't start
- TISTUD-7746 - LiveView via CLI does not work (anymore) until it has been used via Studio after install/update
- TISTUD-8736 - Studio hangs upon opening file in offline mode when there was no previous appc session
- TISTUD-8832 - Fix NPE for String Join within StringUtil
- TISTUD-8858 - Studio support for new API Builder UI URL
- TISTUD-8889 - Error Reporting: Import Project from dashboard throws NPE intermittently
- TISTUD-8976 - Eclipse Oxygen: Issues in Studio Preferences
- TISTUD-8985 - Eclipse Oxygen: UI Issues in the Windows OS
- TISTUD-9004 - How do I switch back to previous studio version
- TISTUD-9042 - iOS: Create modules in "dist" directory
- TISTUD-9043 - Appc Studio Installer crashes during install process if only JDK 9 is installed
- TISTUD-9065 - Cannot fully scroll tiapp overview page
- TISTUD-9092 - Error occurred during "Getting Diagnostic Logs"
- TISTUD-9096 - The error marker for any error in script is always shown on the first line
- TISTUD-9099 - Incorrect filename shown in message on the error marker
- TISTUD-9101 - Install android 8.1 by default in the appcelerator studio
- TISTUD-9107 - Studio hangs on Startup
- TISTUD-9108 - Update preview.appcelerator.com/appc-studio with the 64-bit Windows builds
- TISTUD-9112 - Avoid sending studio crash reports in development and testing mode
- TISTUD-9123 - Issues with the re-engineered session management
- TISTUD-9129 - Cannot launch studio with JDK 11
- TISTUD-9137 - Studio prompts for hyperloop plugin update with SDK > 7.0 if hyperloop folder inside modules directory is deleted.
- TISTUD-9140 - [Android]If USB debugging is not accepted on device, user is unable to select device/emulator from drop down menu
- TISTUD-9142 - LiveView: Newline character is displayed when using liveview
- TISTUD-9145 - Syntax errors in imported sample project "hyperloop-examples"
- TISTUD-9199 - Hyperloop: Prompted to install very out of date Hyperloop 1.2.8 release

- [TISTUD-9200](#) - Android: Debugger does not hit breakpoint for an alloy app on a device.
- [TISTUD-9203](#) - macOS RCP: zipped RCP .app folder is not signed, causing macOS to report as damaged or refusing to open
- [TISTUD-9211](#) - Issues with version number and About page in RC build
