

Dashboard 7.3.1 Release Note

Dashboard 7.3.1 - 15 April 2020

Dashboard 7.3.1 is a patch release, which includes an improvement and bug fixes.

Improvements

- Added links to the Visual Studio Code Extension for the Titanium installation and documentation on the **App Builder Getting Started** page.

Fixed issues

- Fixed a rendering issue on the **Edit User Account** view which may have been prohibiting users from editing their account information.
- Fixed an issue where the AMPLIFY Runtime Services application environment variables were not shown or editable on the **Edit Config** page.
