

Dashboard 7.2.4 Release Note

Dashboard 7.2.4 - 24 February 2020

Dashboard 7.2.4 is a patch release, which includes an improvement and several bug fixes.

Improvements

- Display a warning message and confirmation if an org administrator attempts to change their Platform role.

Fixed issues

- Fixed an issue where nav and crash events may have appeared on App Analytics **Events** view's counts, charts, and tables.
- Fixed an issue where changes on the user's **Settings** page may not have been saved correctly.
- Fixed an issue where app creators may not see available actions for their apps on the **All Apps** view.
- Fixed the chart animation on the App Analytics **Real Time** view.
