

# The Dashboards

The AMPLIFY Platform provides different dashboards based on your role and capabilities.

- **AMPLIFY Platform Dashboard** - provides you full lifecycle visibility and real-time insights for all of your apps and APIs.
- **AMPLIFY Visibility** - provide a way to visualize the data that is ingested from various products.

To access the dashboards, click the **Dashboard** link from the AMPLIFY Platform home page.

The screenshot shows the AMPLIFY Platform home page. The header includes the AMPLIFY Platform logo, a user profile for 'john doe', and a 'Help & Resources' link. The main content area is titled 'Welcome to AMPLIFY' and features several sections with buttons: 'Orchestrate data between Cloud Services' (Start building), 'Connect to Cloud and On-Prem Services' (Get started), 'Connect to an edge gateway' (Connect), 'Secure and Govern an API' (Import), and 'Discover Integration Assets' (Discover assets). On the right side, there is a 'MY CAPABILITIES' section with a 'Dashboard' link highlighted by a red box. Below this are 'Integration Builder', 'Central', and 'Unified Catalog'. At the bottom right, there is an 'EXPLORE MORE' section with a link to 'Explore more Products and Services available on the AMPLIFY Platform'. The footer contains the version number '8.0.0' and links for 'Documentation', 'Status', 'Release Notes', and 'Terms'.

When you click the Dashboard link, one of the following happens depending on your role and capabilities:

- You are taken to the *AMPLIFY Platform Dashboard* home page.
- You are taken to the *AMPLIFY Visibility* dashboard page.
- You are taken to the *AMPLIFY Platform Dashboard* home page and there is a tab in the left navigation to the *AMPLIFY Visibility* dashboard.
