

AMPLIFY Dashboard Release Notes

Dashboard 8.4.2 - 1 March 2021

Dashboard 8.4.2 is a patch release, which includes a new feature and an improvement.

New features

- Organizations entitled to use their own Identity Provider for authenticating to **Amplify Platform** may now configure more than one Identity Provider. See the [Configuring and Managing Identity Providers documentation](#) for more information.

Improvements

- Added specific browser vendors and versions supported by **Amplify Platform** to the [Supported Browsers](#) page.
