

# Dashboard 8.3.2 Release Note

## Dashboard 8.3.2 - 17 December 2020

Dashboard 8.3.2 is a patch release, which includes an improvement and a bug fix.

### Improvement

- Improved handling of redirects after login or activation when initiated from portals or xPaaS services.

### Fixed Issue

- Fixed an issue when configuring P8 format certificates on iOS Push Notification settings for **Mobile Backend Services** datasources.
