

Dashboard 7.2.6 Release Note

Dashboard 7.2.6 - 25 March 2020

Dashboard 7.2.6 is a patch release, which includes improvements and several bug fixes.

Improvements

- Subscription dates on the **Organization** overview page are now shown as UTC.

Fixed issues

- Fixed an issue where AMPLIFY Runtime Services analytics chart and table views may not have rendered properly.
- Fixed an issue where Mobile Backend Services Review object types could not be edited.
